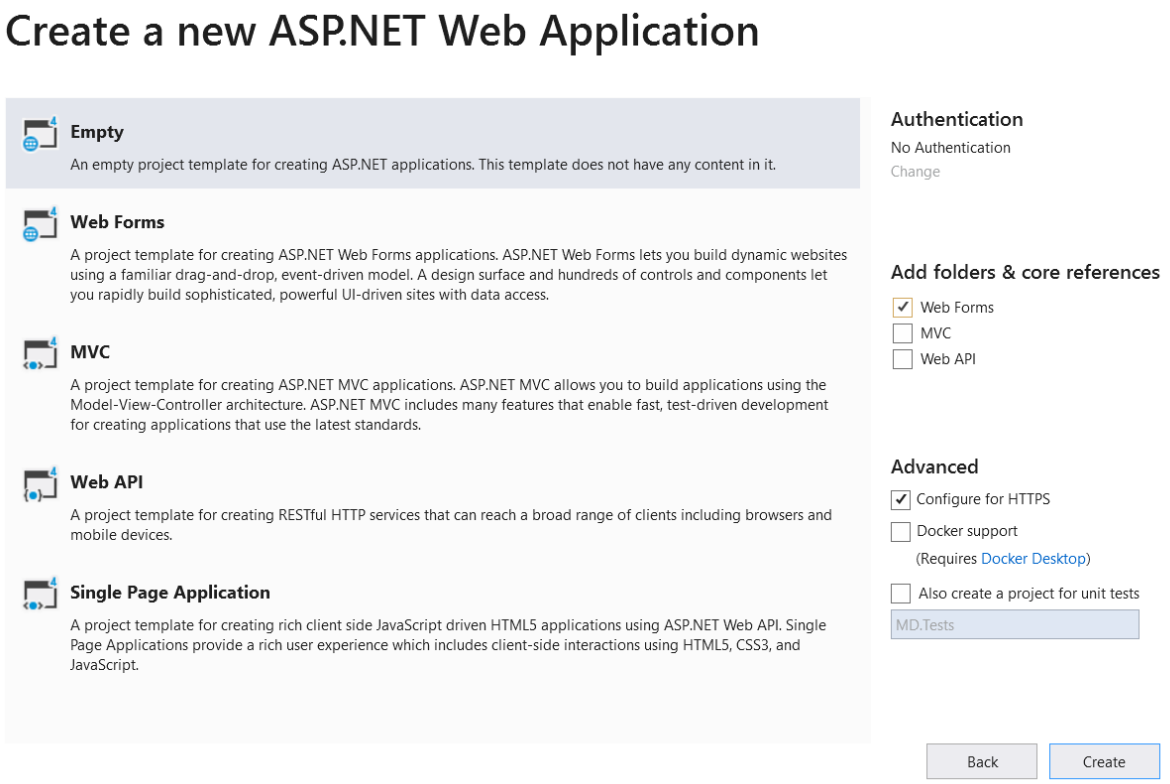
Aim

To create a Master Page and multiple Content Pages and set the Home page as the start page.

Procedure / Steps

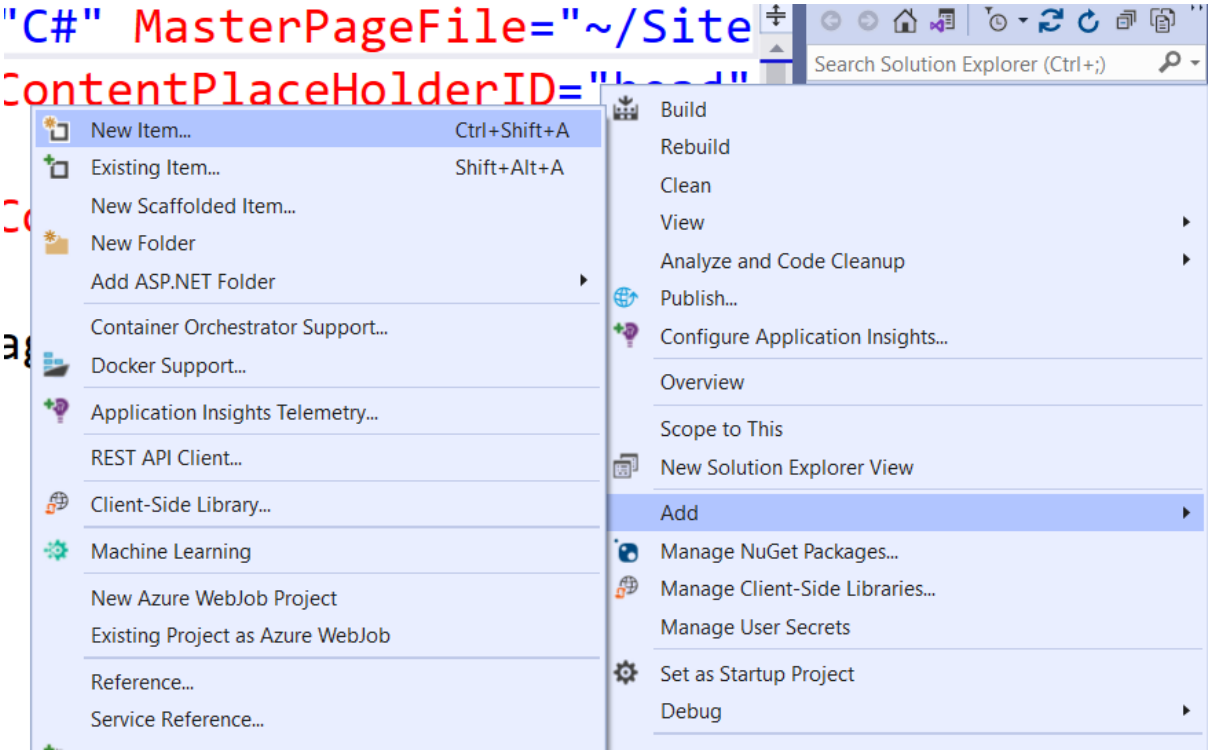
Step 1: Create New Project

1. Open Visual Studio
2. Click **Create New Project**
3. Select **ASP.NET Web Application (.NET Framework)**
4. Click **Next**
5. Enter Project Name → MasterPage_Demo
6. Click **Create**
7. Select **Empty Template**
8. Tick **Web Forms**
9. Click **Create**

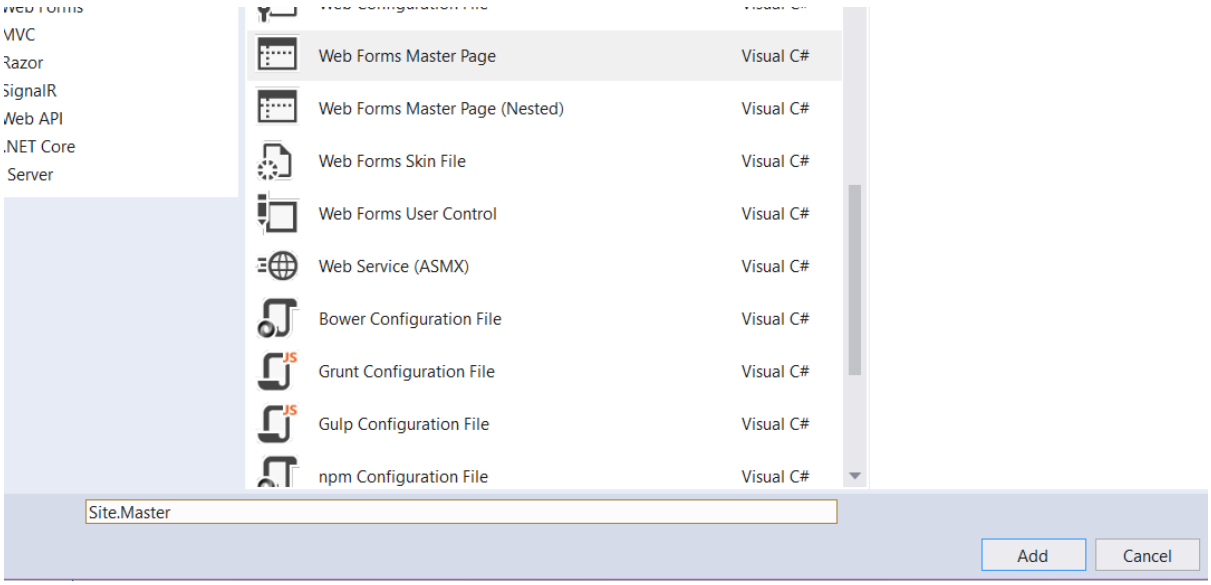


Step 2: Add Master Page

1. Right-click Project → **Add** → **New Item**

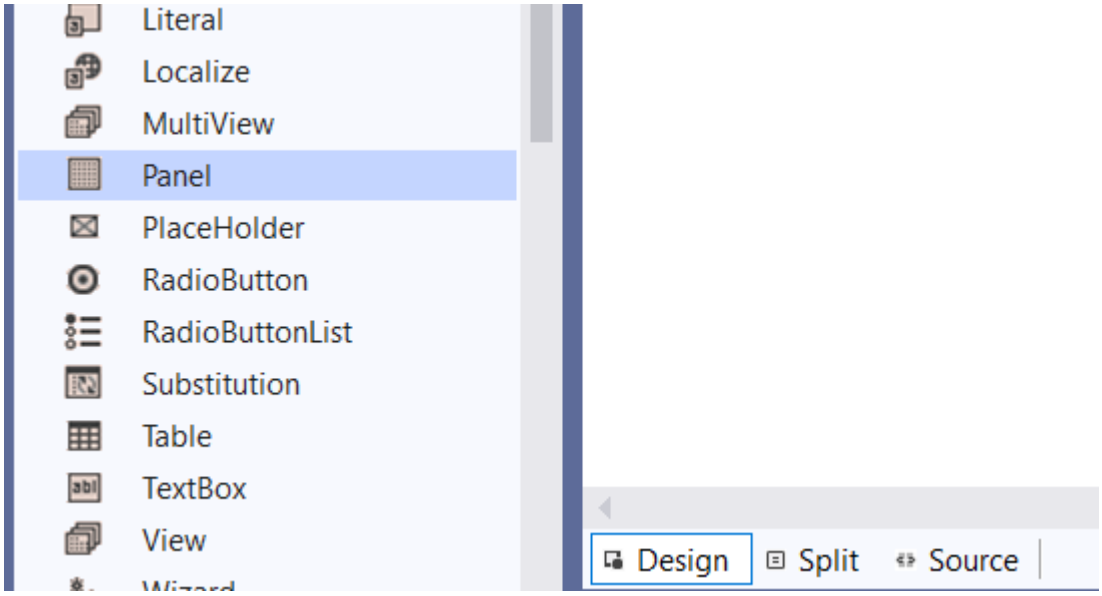


2. Select **Master Page**
3. Name → Site.master
4. Click **Add**



Step 3: Design Master Page (Drag & Drop)

1. Open Site.master → Design View



2. Drag **Panel** → set ID pnlContainer
3. Inside it add:
   - **Header Panel** (pnlHeader) → Copy image folder in your project and then Insert Image
   - **Menu Panel** (pnlMenu) →Add HyperLinks:
     - Home → ~/Home.aspx
     - About → ~/About.aspx
     - Contact → ~/Contact.aspx
   - **ContentPlaceHolder** → ID ContentPlaceHolder1
   - **Footer Panel** (pnlFooter) → Add copyright text

Or else write the code:

Site.master:

```
<%@ Master Language="C#" AutoEventWireup="true" CodeBehind="Site.master.cs"
Inherits="Masterpage_Demo.Site" %>

<!DOCTYPE html>
```

```
<html>
<head runat="server">
    <title></title>
    <asp:ContentPlaceHolder ID="head" runat="server">
    </asp:ContentPlaceHolder>
    <style type="text/css">
        .auto-style1 {
            width: 443px;
            height: 114px;
        }
    </style>
</head>
<body>
    <form id="form1" runat="server">

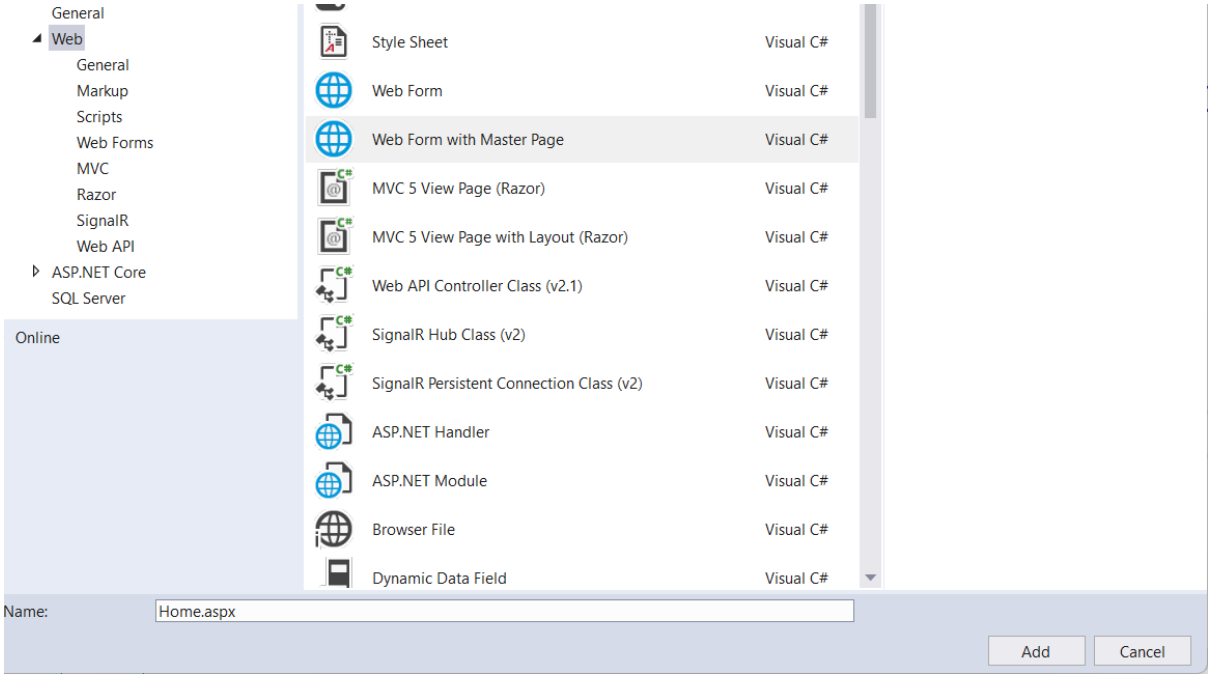
        <asp:Panel ID="pnlContainer" runat="server" Height="231px" >
             <asp:Panel ID="pnlHeader" runat="server" HorizontalAlign="Center">
                <img alt="" class="auto-style1" src="Images/images.png" />
            </asp:Panel>
            <asp:Panel ID="pnlMenu" runat="server" HorizontalAlign="Center">
                <asp:HyperLink ID="hlHome" runat="server"
NavigateUrl="~/Home.aspx">Home</asp:HyperLink>
                 | |
                <asp:HyperLink ID="hlAbout" runat="server"
NavigateUrl="~/About.aspx">About Us</asp:HyperLink>
                 |
                <asp:HyperLink ID="hlContact" runat="server"
NavigateUrl="~/Contact.aspx">Contact Us</asp:HyperLink>
            </asp:Panel>
            <asp:Panel ID="Panel1" runat="server">
                <asp:ContentPlaceHolder ID="ContentPlaceHolder1" runat="server">
                </asp:ContentPlaceHolder>
                </asp:Panel>
            <asp:Panel ID="pnlFooter" runat="server"
HorizontalAlign="Center">Copyright Rights Reserved &copy

            </asp:Panel>
        </asp:Panel>

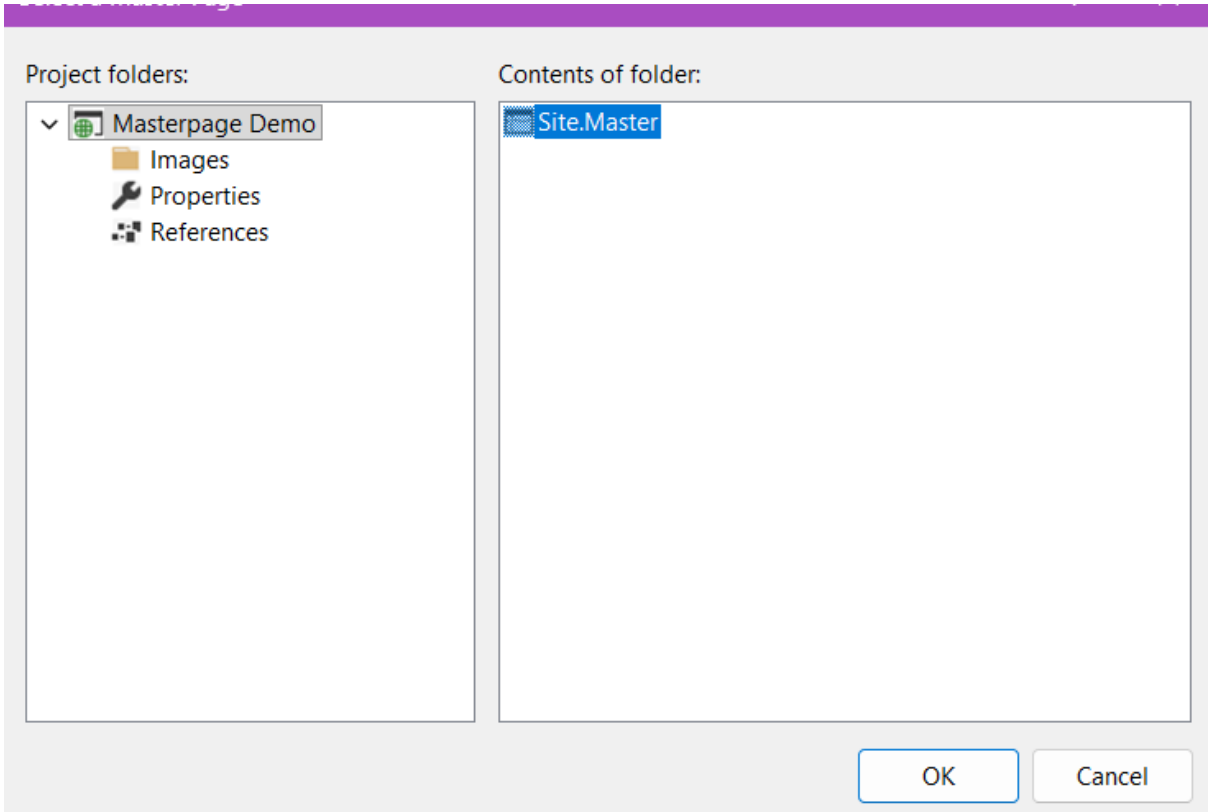
    </form>
</body>
</html>
```

Step 4: Create Home Page

1. Right-click Project → **Add** → **New Item**
2. Select **Web Form with Master Page**
3. Name → Home.aspx



4. Select Site.master → Click **OK**



Step 5: Design Home Page

1. Open **Home.aspx**
2. Inside ContentPlaceHolder1, add:

<h2>Welcome! </h2>
This is My Home Page!

```
<%@ Page Title="" Language="C#" MasterPageFile="~/Site.Master"
    AutoEventWireup="true" CodeBehind="Home.aspx.cs" Inherits="Masterpage_Demo.WebForm1" %>
<asp:Content ID="Content1" ContentPlaceHolderID="head" runat="server">
</asp:Content>
<asp:Content ID="Content2" ContentPlaceHolderID="ContentPlaceHolder1" runat="server">

    <h2> Welcome!</h2>
    <p> This is My Home Page!</p>

    </asp:Content>
```

Step 6: Similarly Create About Page

Step 7: Design About Page

1. Open About.aspx
2. Add:

<h2>This is our About Us Page! </h2>

```
<%@ Page Title="" Language="C#" MasterPageFile="~/Site.Master"
    AutoEventWireup="true" CodeBehind="About.aspx.cs" Inherits="Masterpage_Demo.About" %>
<asp:Content ID="Content1" ContentPlaceHolderID="head" runat="server">
</asp:Content>
<asp:Content ID="Content2" ContentPlaceHolderID="ContentPlaceHolder1" runat="server">

<h2> This is our About us page!</h2>
</asp:Content>
```

Step 8: Create Contact Page

Step 9: Design Contact Page

1. Open Contact.aspx
2. Add:

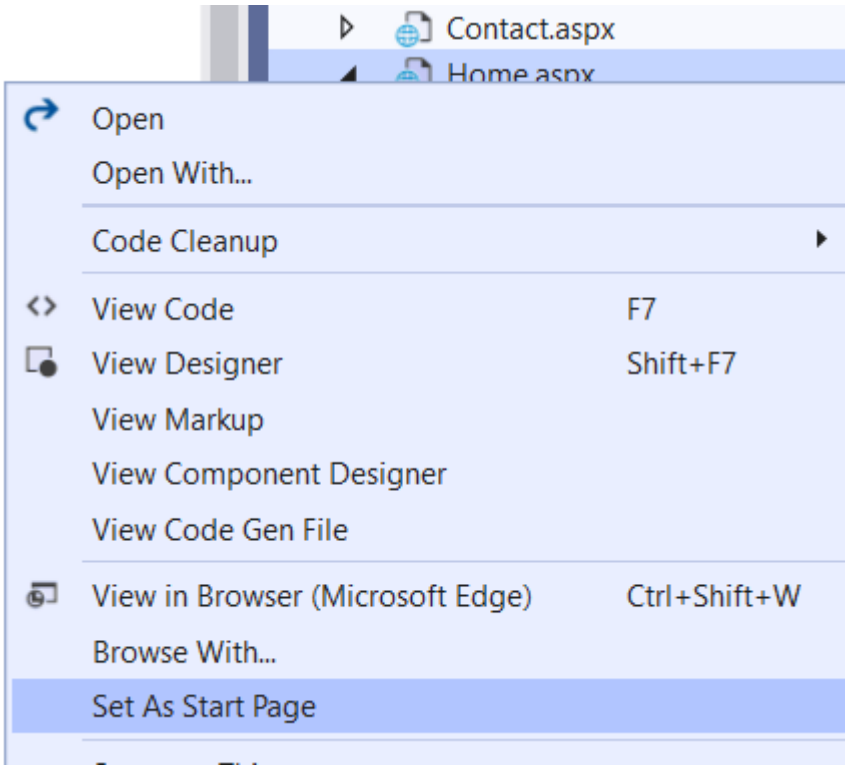
<h2>This is our Contact Us Page!</h2>
Address, Phone, Email details

```
<%@ Page Title="" Language="C#" MasterPageFile="~/Site.Master"
    AutoEventWireup="true" CodeBehind="Contact.aspx.cs" Inherits="Masterpage_Demo.Contact" %>
<asp:Content ID="Content1" ContentPlaceHolderID="head" runat="server">
</asp:Content>
<asp:Content ID="Content2" ContentPlaceHolderID="ContentPlaceHolder1" runat="server">
    <h2> This is our Contact Us Page!</h2>
    <p>
        <b>Address:</b> S.No.341, Next To New English School, Govt. Colony, Bandra East, Mumb
        <br><b>Phone:</b> 022-31621953
        <br><b>Mobile:</b> +918291679488
        <br><b>Email:</b> director@hiray.org.in
    </p>

</asp:Content>
```

Step 10: Set Home Page as Start Page

1. In Solution Explorer
2. Right-click on **Home.aspx**
3. Click → **Set as Start Page**



Step 11: Run the Project

1. Press **F5**
2. Browser opens with **Home.aspx**
3. Click menu links to navigate:
    - Home
    - About
    - Contact

Conclusion

A common layout was implemented using Master Page and multiple pages were created using ContentPlaceHolder.
